will not Bastard ... And there are rest in the Spirit!!!

They said: (no regrets ... because you only have one life Vhbha for your freedom(.

This is what the free and the most expensive national...

Dear readers and readers ... We are all lovers of freedom the most beautiful ... Surmounted by a bend in front of the great, and cherish her name, which brings us back to Our humanity and Aftratna first.

The tyrants and the like are far from understanding the greatness of free peoples, but says that the earth is this .. And history tells so ... The will of Liberal haunt of criminals .. And here is the Yemeni people have started to make the first steps of freedom after a months-long patience of a cramped, where subjected to murder, torture and destruction and economic restrictions and imprisonment, and all means of oppression, and yet maintained a peaceful revolution to reach the ultimate goal ... And may the dawn of salvation loomed ... Is it Mtaz O tyrant Sham!??

We have abandoned fear the issuance of our youth, and lived in Joinham the will of the shreds of life down to the street and demand to drop the system and execution Didnhm tyrant, and obsessed with ... The right neighborhood does not die and the amount of force does not extinguish the claims of freedom and does not make you give up the idea of a secure and dedicated his life for it .. , And that is what makes us solid expansion of the demonstrations and the participation of large parts of the country, and start to join the group rode the silent revolution, no sane person in need of evidence on the justice of the demands of Syrian people, and he sees repression and killings Agriqan streets and the world does not move! !

The time of convictions over, and the time to speak and give opportunities for criminals to exaggerate in the killing is over ... , Time of day the concrete steps .. , Our girls In their prisons, and our men spend months in detention, torture, either to return the martyrs and to lose limbs, any crime that did not know its history and not seen!

And from that calculates Alaagal in the blood makes people fear a barrier to freedom to think he is wrong .. And us in the championship city master Khaled best testament to the patience ... Filed a martyr, a martyr ... And salutes the funeral funerals and death Dtharhm and drink, but they did not Alinwa ... Blockade and hit them if we go back thousands of years ago suggested on our master Salman the Persian idea of the trench to save the Muslims from their enemies, the day the enemies of humanity and human resources to restore the idea, but not to destroy our people to protect them ... Iguensoa for their young and their youth Kalasaver .. To apply them not only to keep down their lives in the yard, it was no more likely today And not only the return of the crown and freedom in the hands of the free. She lived Sham dear IvIha serial killer serial killer

we are people of **freedom**

*Assad Threatens To Fight Till Death,
Surviving A Second Coup Attempt*

With the end of the ultimatum the Arab League extended to the regime to end the violence, Bashar Assad announced through an interview with the Sunday Telegraph that he will keep on resisting the revolution. Assad added that the struggle will continue, as well as the pressure to subdue Syria, which will never budge. Assad also promised to fight personally to death against the foreign forces. Gadhafi made the same promise when the NATO enacted a no-fly zone over Benghazi.

Organization of Islamic Cooperation (OIC) announced it will hold an emergency meeting next Saturday in its headquarters in Jeddah, Saudi Arabia to entice the Assad regime to stop violence against civilians and to encourage political reform. The OIC will also hold a meeting to discuss the proposal for conducting a dialogue between the regime and

the opposition. The OIC has warned of the internationalization of the Syrian issue, and has declared its utter refusal for foreign intervention in Syria, even for the sake of protecting civilians.

In Homs, security forces shelled and opened heavy machinegun fire on the neighbourhoods of Jab Jandali, Qusoor, Bayada, and Bab Amr; and the cities of Qusoor and Hoola. The phenomenon of body organs theft is still carried on by the security forces, while the other phenomenon of converting public service centres to military compounds continues, as the Faculty of Medicine and Anatomy was converted to a forward military base, after the conversion of the Petro-Chemistry Faculty, the Department of Health, the University Dorms, hospitals, clinics, and many schools. As usual, night demonstrations broke out in the neighbourhoods of Der Balba, Bayada, Khaldiya, Jorat Shayah, Qarabees, Ghouta, Hamra, Inshaat, Bab Amr, Jorat Arayes, Hay Shammass, Karm Shami, Midan, Jab Jandali, Karm Zaytoun, Nazheen, Hay Asheera, Bab Draib, Slaybet Asyati, Bab Hood, Qusoor, and Waar; and the cities and villages of Hoola, Qaseer, and Hasya. At least eleven civilians have been killed today in Syria; most of the victims were killed in Homs.

More defections were registered today in Rastan. Most of the mutineers and defectors attack their commanding officers and security officers before escaping and returning to their towns and villages to create resistance cells to defend demonstrations and to target

Assad's militiamen and security personnel that kill and torture civilians. Most of these cells expand by recruiting civilians as 90% of Syrian males are subjected at least two years of mandatory military service, therefore no military training is required. Additionally, all the formed cells and resistance pockets are completely independent in their decisions and are influenced in their decisions by none. However, a major division in Homs is currently uniting all these cells and pockets.

Another coup attempt took place today, as warplanes were going to be used to bomb the Presidential Palace and Maher's fourth Regiment base, to stop the Assad rule and help Syria avert the civil war desired by the Assads and Iran. Consequently, Assad banned the use of warplanes, and ordered the plane stripped bare of weapons and emptied of fuel.

Assad Forces Arrest Hundreds and Target Christians And Alawites To Spark A Civil War

The three-day ultimatum extended to the Assad regime by the Arab League to end the violence came to an end today, amidst fears within the ranks of the regime and its allies of foreign intervention. The Assad regime has accepted the League's settlement plan and the dispatch of a 500-member delegation to assess the humanitarian condition in Syria; however, it has proposed some amendments which are currently under consideration.

With the end of the Arab League's ultimatum, security forces arrested hundred in Idlib, Hama and Homs, after communications were cut off most of these areas which also suffered heavy artillery shelling. It is noted that 400 were arrested in the Hama towns of Himasya and Shizar. Moreover, security forces killed at least nineteen today in security operations and clashes with defected soldiers in Idlib, Hama and Homs, as dozens of soldiers defect in those areas daily.

In Homs, security forces shelled and opened fire on the neighborhoods of Khaldiya, Bayada, Inshaat, Bab Amr, and Jobar. The regime continues to punish the residents of Homs as heating fuel and electricity are still cut off in most of the areas. In a new development, Assad militiamen have recently started cutting off roads and stopping cars randomly to rob the passengers, even if the passengers were Christians or Alawites. This phenomenon stems from the regime's inability to pay its mercenaries anymore, therefore it has permitted massive and systematic looting, which was first witnessed in Hama in Ramadan when army trucks would come to clear entire houses of the furniture, similar to what happened in the 1982 Hama massacre led by Rifat al-Assad, who was later dubbed the Hama Butcher. On another note, Assad militiamen have also started kidnapping and raping Christian and Alawite girls, to incite sectarianism in Homs as the regime realizes the only way it could stay in power is through an agreement similar to Lebanon's Ta'ef Settlement.

As usual, demonstrations broke out in the neighborhoods of Bab Sbaa, Maraija, Bab Draib, Jab Jandali, Karm Zaytoun, Der Balba, Bayada, Khaldiya, Jorat Shayah, Qaramees, Waar, Qusoor, Ghouta, Hamra, Inshaat, Bab Amr, Jorat Arayes, Shammas, Hay Asheera, and Karm Shami, and the city of Hoolah and town of Palmyra.

Press Release

The Syrian National Council meets with the French Minister of Foreign Affairs and the EU High Representative of Foreign Affairs

The French Foreign Minister, Alain Juppé, received on Wednesday, the 23rd of November, a Syrian National Council delegation, headed by Dr. Burhan Ghalioun. The talks dealt with the developments in Syria, including the French position. The delegation expressed gratitude to the French minister on the efforts by France to alleviate the suffering of the Syrian people and the leading role of France in working with international organizations to isolate the Syrian regime. The French Minister promised to continue pressing on the Syrian regime to stop the massacres it is committing against the unarmed people of Syria. The minister also provided a summary of the efforts that France has undertaken to obtain a UN resolution condemning the repressive practices of the regime and opening the way for mechanisms to protect civilians, which is the main demand of the Syrian National Council.

During the debate over the possibility of sending international observers to protect civilians, the French minister noted the resentment of Arab and European countries of the unresponsiveness of the Syrian regime to any initiatives regarding this matter, which is what is pushing the international community to consider other mechanisms, in light of the increasingly deteriorating humanitarian condition in some places, like Homs. The two sides searched for a possibility of finding safe outlets to deliver humanitarian assistance to stricken areas, which are the target of operations of repression and torture by the regime's security and Shabiha (armed state-hired civilians). These safe outlets would be consistent with legal international principles that hold the international community responsible of protecting civilians. The delegation also briefed the French minister of the Council's tireless efforts, through the Arab League, to complete its structural organization and present its vision for the transitional period, which includes Bashar al-Assad stepping down and a peaceful transition of power to a transitional government that leads the country to a democratic pluralistic system. During a press conference that included minister Juppé and Dr. Ghalioun, the French minister said that his meeting with the Council's delegation is recognition of the Council as a legitimate entity with which the French government will deal during this stage of the Syrian people's struggle for their freedom and dignity.

The Syrian National Council delegation, headed by Dr. Ghalioun, also met on Tuesday, the 22nd of November with Catherine Asthon, the High Representative of the Union for Foreign Affairs and Security Policy, with the Chairman of the European Commission on Peace and Security, and with representatives of the 27 member states in the European Union. During these meetings, the most important issues about the Syrian situation were discussed, starting from clarification of the Russian position — following the Council's visit to Russia — and the possibility of developing this position and explanations thereof. The Arab position was also discussed, where it was noted that the Europeans had expected the united Arab position to influence the Russian and Chinese positions. The Council's delegation requested from Europe to find a solution to the Syrian situation, as Europeans have had a long history of protecting civilians and have the tools and techniques that enable them to play a practical and direct role in this context with humanitarian aid and medical assistance.

Representatives of the Union's member states expressed their respect for the great Syrian people who are continuously sacrificing their lives. The representatives also expressed their support for tougher sanctions against the regime. The National Council will present to the European Union further proposals in this regard. All sides also discussed some inquiries regarding the Council's plan for toppling the regime; putting in place safeguards to protect the rights of religious and ethnic minorities; and the position regarding the Free Syrian Army with the need to adhere to the peaceful nature of the Revolution and only supporting operations that protect civilians (in Homs, for example). The Council confirmed the importance of having the military under the control of civilians in Syria in the future, and that the Council is the political representative of the Free Syrian Army.

Hague Meets with SNC President, Iraqi Mayor Reveals the Entry of Shiite Militiamen to Syria

In his first meeting with the Syrian opposition, British Foreign Secretary William Hague met SNC President Burhan Ghalioun and other Syrian opposition figures and urged them to unify to become stronger. Hague stressed the necessity of the opposition's unity, and reiterated the UK's desire for Assad and his regime to stand down over the intensified security crackdown on the peaceful demonstrators.

Mayor of Anbar province in Iraq, Qasem Muhammad Fahdawi, announced that he is in possession of accurate and verified evidence that confirms the entry of Iraqi Shiite militiamen of the Sadr movement into Syria to assist the regime. Many Iraqi observers believe Fahdawi obtained this sensitive information from the Walid border point which is under the direct administrative and security supervision of the Anbar local administration. SRCC received the same info last week, indicating that a hundred buses entered Deir Azzour with at least 5000 Shiite militiamen. An Iraqi Member of Parliament has called for a full-fledged investigation regarding this matter.

UK Foreign and Commonwealth Office announced that the international community will continue to pressure the Assad regime, as another round of European sanctions is currently under consideration. The FCO added that the Francis Guy, the former ambassador to Lebanon, will undertake the task of establishing relations with the opposition. On the other hand, Turkish Prime Minister Recep Tayeb Erdogan said that Assad's days are numbered, and that he cannot stay in power indefinitely. Erdogan also criticized the regime's excessive use of violence against the peaceful demonstrators.

Assad regime forces killed at least fourteen civilians today in different areas in Syria, mostly in Homs. Security forces also planted landmines in Wadi Karam on the Lebanese borders.

In Homs, security forces shelled and opened heavy machinegun fire on the neighbourhoods of Bab Draib, Bab Sebaa, Bayada, Ghouta, Qarabis, Qosur, and Deir Baalba, while the siege continued on the neighbourhoods of Bayada, Baba Amr, and Karm Zaytoun, as medical supplies, heating fuel, and medicine are still banned. As usual, demonstrations broke out from the neighbourhoods of Waar, Qosur, Khaldiya, Bayada, Deir Baalba, Bab Sebaa, Bab Draib, Slaybat Asyati, Bab Houd, Ghouta, Hamra, Inshaat, Karm Shami, Karm Zaytoun, Nazhin, Hay Shammas, Jab Jandali, Hay Ashira, Baba Amr, and Joret Arayes; and the cities and villages of Houleh, Qaraytain, Palmyra, and Qasir.

On another note, doctors in Homs confirmed the usage of poisoned bullets by Assad's security forces, as many demonstrators with superficial wounds have died after exhibiting side-syndromes of organ failure.

Why human rights in the Levant under the chair?

rights and their property months ago has allowed the Committee, but did not enable us to know freedom and the security team accompany her and only the authorities by staying in Damascus under the pretext of preserving the lives of its members, as well as missions of food, charitable, medical and Red Cross and Red Crescent, the Arab and international Authority transgressing not is unforgiving of civilians nor open any room for is to alleviate the impact of adversity on them, and so they did not have not gloriously ignorance and mercy of Islam, and the poor people oppressed Mstalp rights in every field The first of the soul which Allah has forbidden to kill her, wound, abuse and insult their dignity, tortured and mutilated and still the scene continues, especially for women and children, and hit the Senate but died endowed the Authority is proud Babadtha mass of people and bombed in their homes and vandalizing them with heavy weapons and internationally banned systematically, as well as the crime of plunder and looting even stolen homes too many in many places not to mention immoral and illegal and unlawful detention of the hostages of the men and women of all oppression and torture in order to deliver those who see him, accusing himself of any you should be considered by most people is the accused and the rest should be his fate dependence humiliating, and this method of villainous also in dealing with people forbid it Shara as in Sura Yusuf (God forbid that I take only found our luggage has Verily if unjust) has banned the Article 33 of the Geneva Conventions, legal, add to what little ban the Arab media and foreign coverage of events as if he did not create only agency SANA and Television Syrian channel and lower in Damascus if the authority has no credibility in the forgery and lying in the media to allow each channel monitoring and the owner of the right that was with him right should not worry or fear, then we asked any information that enters the coverage even if the media were Chinese or Russian, where pride of power that their positions with them and we are confident that they would gave up a margin limited the freedom of the signed news and tragedies Chip horror newborn, but we do not admire these people and these because they are accomplices to slaughter people in the name of national alleged or the party and keep it because it is a safety valve for the nation as they were and still claim, and here I remember what he said Rifaat al-Assad with Bashar in a speech in the national leadership in Damascus in 1980, that Stalin killed ten million in order to maintain the Communist Party and the power and if we want to stay for it must be this, which Try Hafez Assad drawing on experts Russians then in the city of Hama, where the long-demolished most cited by those revolutionaries in a period of twenty-seven days, more than forty-five thousand, and here comes his son Bashar to confirm the hostility of the true homeland and the citizen but in understanding upside down, as recently emphasized the newspaper the Sunday Times of London that what is happening in Syria is the fighter armed, and the defense of the homeland and that he would work everything and infinite for the sake of the salvation of the current situation and that he created to serve the country not served by the nation, what is the attitude toward this twisted logic has become who defend themselves, which is approved by all the laws and opinions defendants, as well as those who defend the unarmed demonstrators who fall martyrs and the world is witnessing Bslmathm where did not kill one of them, along with any weapon is now protected in accordance with evil is no doubt that the protectors of homes are these officers and soldiers who had sided with the people, not protectors of Bashar, who betrayed the trust in the section Halvoh to protect the homeland, not power and corrupt government oppressive, that Bashar will work everything and infinite no matter how glibly in the murder that addictive in order to maintain the chair is not home, which if true, including claims of stop killing machine for the Syrians the good guys used by the security, military and Cbihh of repression Avasubh criminals Kalmamnin not worsened the rule. If the communist leader Lenin had said to Maxim Gorky There is nothing wrong with murdering three-quarters of the world to be the remaining quarter communist may be biased in this communist right or not, the words Bashar of the newspaper and his statement before in his first speech after the events that the battle had been imposed on us, we are ready with , speaks volumes conclusive over the hatred on both opposed to Althbt power and maintain the family and most of the community and the defense of financial wealth that enriched them and the relatives of Al Makhloof, Shailesh from the sweat of the people and homeland, they know that the repercussions of the fall is much more difficult for them difficulties rivalry with the people therefore put up and intensifying repression brutal Erghawwa by the balance and put the citizens and the protesters when the reality imposed on them, but they overlooked that the Liberals have broken the wall of fear, even as long as the conflict for years, and that all that effort for freedom from sacrifice is small and that the right no matter how long-term and gathered allies falsehood it victor will not die, and what does not step down Bashar today as he told the Sunday Times because most people supported it is essential for him in the end to step down or be disqualified because it does not stand on solid ground of justice and wise policy, as it is not true at all that most people with him as referring to demonstrations and marches, but marches to tighten the Z that are known to free people how to force most of the breakers where Altmzar and threaten Berzagahm and want ambitions of the other, it is true that lead those masses which are of the thugs in power and beneficiaries and sectarian so they will be closest to the cameras and there is an atmosphere of dancing and singing to prove the regime of Bashar How should should be happy that they and their brothers in the homeland of the rebels and their families and innocent people being killed and burned and imprisoned for more than the pit band and fuels the fire of hatred among members of one people, but I am to him that people are honest have known their way, as evidenced by what I am saying that the authority when it attempted since the days to come out the category of pro- her claim in the city of Hama bacillus by the people if they returned without this rebellious backwards, and while others paid to cheer for the system booed him, killing seven of them after they cried:

people want to drop the system!!

There is no doubt that what is available to Bashar from most of the huge army and security with his apparatus the seventeen hundreds of thousands, as well as remnants of Cbihh of hooligans adopted depends on them, all this is available and is available for the rebels and protesters, but they willingly steel must fall this totalitarian regime backward behind human political, social and moral This is the case with totalitarian regimes and rulers as "Ben Ali" and "Blessed" and "Gaddafi", they do not find it saves them immunity has always been, and that the army should return to his sovereign, not politics, and so in tune with itself in cooperation with the Syrian army of free-Sharif who refused to be a tool of the ruling power of brute to keep them terrorizing the people and his arrest and suppress the opposition to return to protecting the country from external threat, was confirmed by Lt. dissident Ahmed Khalaf said it was the army of genocide for the shield. Conclusion: you do not Tguenona patriots Since the home and saw the faces did not get any good and what your policy with the people, but also said Mustafa Sadiq Rafii: Policy hit bombs filled with gunpowder and other bomb filled with ambitions and positions.

News

The Arab League expressed its willingness to send observers to the Syrian Arabs, but required specific commitments by the Assad regime, has been announcing the approval of the system to receive the committee. He said Turkish Prime Minister Erdogan that the West is not interested in Syria because of the lack of acquisition of sufficient quantities of oil. Erdogan accused the great powers by showing its appetite for Libyan oil. Was presented the draft UN resolution demanding the Assad government to end violence and to implement the Action Plan proposed by the Arab League. He joined Jordan, Morocco, Qatar and Saudi Arabia to Germany, France and Britain in care of this decision. Bashar al-Assad while the pledge to continue the crackdown against the opposition protesters in Syria. Bashar al-Assad has also promised to fight in person and death of resistance to foreign forces

Developments of the revolution

Assad's forces are still digging a tunnel on the bar in the eastern neighborhoods Homs to fortify the tanks. Was anchoring Russian aircraft carrier Admiral Kotzheritsky in the port of Latakia. The destroyer escort arrived carrier Admiral Chapanov and two submarines and a cargo tank of the Army of new Russian Assad. While long kidnapping and rape girls top and Christian communities in an attempt to spark a system of sectarian war. He states that he was trying to get Tsybl military coup attempt included the bombing of the presidential palace and the headquarters of the fourth year, aircraft

Economy

The European Union has expanded sanctions on the Assad regime to include 18 other people associated with the suppression of the demonstrators. The director of fuel that there is considerable pressure on diesel by the citizens, rising demand for diesel fuel increased by 264 g while exceeding the increase in the proportion of applications for registration of citizens of the diesel rate of 1200 g from last year

International movements

Called Jordan's King Abdullah II, Bashar al-Assad to step down for the good of his country where he said that if his place to step down. The UN Security Council condemned the attacks carried out by elements of the Baath party against a number of embassies and consulates in Syria. While the cooperation of the Islamic Organization announced it will hold an emergency meeting on Saturday at its headquarters in Jeddah, to urge the Assad regime to stop the violence and the targeting of civilians and promote the implementation of political reform. While France and Morocco decided to recall their ambassadors from Damascus after the embassies were attacked by gangs of resurrection. And called Catherine Ashton, EU foreign Assad to step down

Local media coverage

SANA spoke for the delegations from Russia, Sweden, Spain, Bulgaria, Egypt, Syria and visit broadcast on the lie to what the Western media. News has been published for the support of China, Iran and several Arab intellectuals to Syria. The newspaper also published news of the arrest of several spies and informants for intelligence Alrkzah American Center in Lebanon to show the power of the regime and its allies. Al-Watan newspaper focused on news Alhamah dealt with news of its use by certain groups to gain access to the Security Council and the draft of the Observer Mission and unite the opposition and attack through the delegation of the opposition in Homs to the League of Arab States. This comes in preparation for the system to attack the Council and called him a traitor, that does not have what he wants the system. Baath newspaper and talked about the problems faced by countries in the region to deflect the focus on the issues of Syria, while the agency SANA news agency focusing on Assad's speech to show his courage, determination and intention to resist

Is the crisis in Syria, a long and difficult?

Is it true that the situation of the Syrian crisis, is too complex and that the journey liberation from occupation Asadi long and difficult, or that this is exaggerated? If we ran the railroad history of realism and we knew Sunan cosmic in the course of events and circumstances troubled experienced by humans during forced realized that any crisis in the armed conflict or peace, for example, must have dimensions must stand supervisor about it, contemplating the essence, and the state of its time and place of environmental and Ochkasa struggle, and the curriculum rolling tobacco use to resolve the crisis, if we stood in front of the Syrian case today, a situation which a popular uprising swept undoubtedly a result of the injustice accumulated in the country, which came Bashar al-Assad as an extension to his father, which all carry the superstructure and arrogance, and force and the tyranny of wondrous brought people literally Sham to the edge of the abyss and sneer human rights and to a degree become a citizen proud refusing to humiliation and deception, corruption, and corruption is no longer convince even those letters that were issued and the issue of those who claim knowledge of the legitimate and guide the nation as he saw horns and hypocrisy Hbiyh cut through the creation of the right and agree that authority its eradication of dissent without the co-existence or to absorption Taking reared spring Arab Tunisia, Egypt, Libya and Yemen found the Liberals another reason for their uprising is the need to run on the road to change a request for freedom, equality and a decent living against the autocracy's totalitarianism and increased resentment inheritance Republican, which began with Syria, without real justification little efficiency or honesty in the approach to the compass of dialogue, brotherhood and justice it was aligned to the family and some of the community is the engine lasting for the conduct of a machine of oppression and seemed new political rule Syria, either to speak thousands of words that do not reflect the only chatter calling for resentment or keep silent about something as if he tells you in words, of course, does not affect often only to answer the negative according to his desires and the logic of the family and some of the community, all due to poor insight, and contempt of others, I have hp rebels Bhrkihm fully peaceful and gave and paid for the freedom

of thousands of martyrs, despite the claim of the system as an armed revolution and must reward their owners with blood and all kinds of repression and now they are heroes Sabiroon of all stripes and types of and ages, and women and children has become known today that the long journey to make sacrifices on the altar of liberty before a fierce monsters and do not know the religion or morality or to the charity and compassion as a place they guarded home .. And the nation innocent of them .. What are the only clique searching for the survival of the chair and the rule of the chair and looting the name of patriotism, of any credible national traitor kills people and does not work to protect civilians, but slaughtering them like sheep and eradicate all civilian demolition, burning and preventing food and medicine for the people, but that must be said, and advised by the heroes in Syria is patience and patience and Astabar and insist on this revolution to bear fruit and that long-term.

Yes the road is long but it is only connected to safety and the attainment of semen, and the more sacrifices should know Liberals are on the right track not a revolution without sacrifice, and know that they are on the right, as Ali may Allah be pleased with him: The State of falsehood hour and the State the right to do time and battled right to a convulsion, and tuberculosis Saif prostitute killed him because "the right not to force Alglba" and the Sultan and his evil coward and the truth and the truth Kalnhalh combine honey and guilt needle, as Pascal said, this is a revolution bitter taste and the sweetness of experienced and this is the path Excellencies risky and thorns no roses and herbs, it is a long battle, yes to a loser and the opposition winning in the end, as the victory in the end to potential strikes and is absorbed by and defend the religion and honor and the people not those who strike without having the right mind and on this being Sunan important rant regime and its allies, regional and international Almotoron, even if they thought that the torch of truth and the truth will be extinguished to continue the terrible repression Where are the words of Abu Risha:

Does not die right whatever to grief

Ardah the grip of a rapist

It's in the speeches of Syria is not complicated to easy-Allaah be upon him, but is complicated for the government, the unjust do not know where and how to go really to resolve the crisis, which is easier than eating dates and drinking water over them if they returned for reckless and reconciled people, and repented and regretted her and punished the perpetrators, led by the killer Bashar and his brother, Maher, and then offset those affected and maintained - if the claims of national - the national sovereignty is the claim of defiance and resistance to it as well as to crush the people and not the Zionist occupiers and it is also not complicated by that responded to the Arab League initiative that was approved in nineteen Arab countries against Iraq, which abstained from voting, Lebanon and pro-killer for its participation in the target, as the Hezbollah, which govern the day and Yemen is happy because he faces the same fate faced by the rulers of Damascus. The imposition of political and economic sanctions on the regime in the decisions of the university yesterday is evidence of a 11/13 guy this system and Acetkbarh, and request the protection of civilians by the university, which we support any and protect them as well from the Organization of Islamic cooperation .. This could lead to the solution of the crisis that responded to the system and only then blame if the United Nations approved the protection of civilians and entered our country, Syria is a member and must protect its people, then even if it was the military intervention which has no occupation and hit the sites of the system and concluded that the nation it is not strange because it is main reason for the coming crisis and short-and long-Hakim Allbeb is dealing with the Sharia and the mind.

Why human rights in the Levant under the chair?

If you want to read the tip of the iceberg of human rights violations that Sanha Islam and other religions and international humanitarian law, even if to varying degrees between the project and the subject, I refer you to the Syrian file in the meantime especially in the era of Hafez Assad and his son Bashar al-Today, Where laid off sight and Besertk you'll find that hatred and injustice, not amnesty and justice are the governors the real on the ground without taking regard for the religious judiciary or civil law or criminal you're in the jungle of the horrors that he does not know the citizens how to be safe in and even if you want to compare

a tyranny of the Zionist Jews in Palestine and the dispossession and imprisonment, families and the suffering imposed on our people there, you will feel the fact that the excesses of the Syrian regime with its people sentenced with iron and fire more than four decades, is worse, and ordered that a reality not an illusion and imagination, exaggeration and avoid the wrongdoers which while not offensive at some of it must know it like the bee that combine honey and guilt needle as Pascal said, and perhaps that explains what we say asked Syria from the Arab League, which will send 500 figures and Arab observers, including military fact-finding, including amendments not be the great figures in the delegation rights or have previously worked in the field of human rights, why? The answer is unknown, especially as to the Syrian territory of more than 35 organizations and human rights body is not licensed and held accountable, including reducing the number to 40 and not allowed to visit families of the martyrs not only what a tour organized by the government, the Arab League rejected them yesterday.

As for the entry of humanitarian missions, human rights and some have urged the United Nations to attend to the shield with a high number of civilian victims and the violation of their

Why human rights in the Levant under the chair?

rights and their property months ago has allowed the Committee, but did not enable us to know freedom and the security team accompany her and only the authorities by staying in Damascus under the pretext of preserving the lives of its members, as well as missions of food, charitable, medical and Red Cross and Red Crescent, the Arab and international Authority transgressing not is unforgiving of civilians nor open any room for is to alleviate the impact of adversity on them, and so they did not have not gloriously ignorance and mercy of Islam, and the poor people oppressed Mstalp rights in every field The first of the soul which Allah has forbidden to kill her, wound, abuse and insult their dignity, tortured and mutilated and still the scene continues, especially for women and children, and hit the Senate but died endowed the Authority is proud Babadtha mass of people and bombed in their homes and vandalizing them with heavy weapons and internationally banned systematically, as well as the crime of plunder and looting even stolen homes too many in many places not to mention immoral and illegal and unlawful detention of the hostages of the men and women of all oppression and torture in order to deliver those who see him, accusing himself of any you should be considered by most people is the accused and the rest should be his fate dependence humiliating, and this method of villainous also in dealing with people forbid it Shara as in Sura Yusuf (God forbid that I take only found our luggage has Verily if unjust) has banned the Article 33 of the Geneva Conventions, legal, add to what little ban the Arab media and foreign coverage of events as if he did not create only agency SANA and Television Syrian channel and lower in Damascus if the authority has no credibility in the forgery and lying in the media to allow each channel monitoring and the owner of the right that was with him right should not worry or fear, then we asked any information that enters the coverage even if the media were Chinese or Russian, where pride of power that their positions with them and we are confident that they would gave up a margin limited the freedom of the signed news and tragedies Chip horror newborn, but we do not admire these people and these because they are accomplices to slaughter people in the name of national alleged or the party and keep it because it is a safety valve for the nation as they were and still claim, and here I remember what he said Rifaat al-Assad with Bashar in a speech in the national leadership in Damascus in 1980, that Stalin killed ten million in order to maintain the Communist Party and the power and if we want to stay for it must be this, which Try Hafez Assad drawing on experts Russians then in the city of Hama, where the long-demolished most cited by those revolutionaries in a period of twenty-seven days, more than forty-five thousand, and here comes his son Bashar to confirm the hostility of the true homeland and the citizen but in understanding upside down, as recently emphasized the newspaper the Sunday Times of London that what is happening in Syria is the fighter armed, and the defense of the homeland and that he would work everything and infinite for the sake of the salvation of the current situation and that he created to serve the country not served by the nation, what is the attitude toward this twisted logic has become who defend themselves, which is approved by all the laws and opinions defendants, as well as those who defend the unarmed demonstrators who fall martyrs and the world is witnessing Bslmathm where did not kill one of them, along with any weapon is now protected in accordance with evil is no doubt that the protectors of homes are these officers and soldiers who had sided with the people, not protectors of Bashar, who betrayed the trust in the section Halvoh to protect the homeland, not power and corrupt government oppressive, that Bashar will work everything and infinite no matter how glibly in the murder that addictive in order to maintain the chair is not home, which if true, including claims of stop killing machine for the Syrians the good guys used by the security, military and Cbihh of repression Avasubh criminals Kalmamnin not worsened the rule. If the communist leader Lenin had said to Maxim Gorky There is nothing wrong with murdering three-quarters of the world to be the remaining quarter communist may be biased in this communist right or not, the words Bashar of the newspaper and his statement before in his first speech after the events that the battle had been imposed on us, we are ready with , speaks volumes conclusive over the hatred on both opposed to Althbt power and maintain the family and most of the community and the defense of financial wealth that enriched them and the relatives of Al Makhloof, Shailesh from the sweat of the people and homeland, they know that the repercussions of the fall is much more difficult for them difficulties rivalry with the people therefore put up and intensifying repression brutal Erghawwa by the balance and put the citizens and the protesters when the reality imposed on them, but they overlooked that the Liberals have broken the wall of fear, even as long as the conflict for years, and that all that effort for freedom from sacrifice is small and that the right no matter how long-term and gathered allies falsehood it victor will not die, and what does not step down Bashar today as he told the Sunday Times because most people supported it is essential for him in the end to step down or be disqualified because it does not stand on solid ground of justice and wise policy, as it is not true at all that most people with him as referring to demonstrations and marches, but marches to tighten the Z that are known to free people how to force most of the breakers where Altmzar and threaten Berzagahm and want ambitions of the other, it is true that lead those masses which are of the thugs in power and beneficiaries and sectarian so they will be closest to the cameras and there is an atmosphere of dancing and singing to prove the regime of Bashar How should should be happy that they and their brothers in the homeland of the rebels and their families and innocent people being killed and burned and imprisoned for more than the pit band and fuels the fire of hatred among members of one people, but I am to him that people are honest have known their way, as evidenced by what I am saying that the authority when it attempted since the days to come out the category of pro- her claim in the city of Hama bacillus by the people if they returned without this rebellious backwards, and while others paid to cheer for the system booed him, killing seven of them after they cried: people want to drop the system!! There is no doubt that what is available to Bashar from most of the huge army and security with his apparatus the seventeen hundreds of thousands, as well as remnants of Cbihh of hooligans adopted depends on them, all this is available and is available for the rebels and protesters, but they willingly steel must fall this totalitarian regime backward behind human political, social and moral This is the case with totalitarian regimes and rulers as "Ben Ali" and "Blessed" and "Gaddafi", they do not find it saves them immunity has always been, and that the army should return to his sovereign, not politics, and so in tune with itself in cooperation with the Syrian army of free-Sharif who refused to be a tool of the ruling power of brute to keep them terrorizing the people and his arrest and suppress the opposition to return to protecting the country from external threat, was confirmed by Lt. dissident Ahmed Khalaf said it was the army of genocide for the shield. Conclusion: you do not Tguenona patriots Since the home and saw the faces did not get any good and what your policy with the people, but also said Mustafa Sadiq Raffi: Policy hit bombs filled with gunpowder and other bomb filled with ambitions and positions.

Child of a national (1) (I)

How many daughters of the nation dear ...

... it's a village fall asleep on the shoulder of the southern province of Dara in Syria

... At a distance of 20 km from the center of Deraa, and enjoys a strategic geographical and military important in the province and had been supervised on a barren plateau, form an obstacle to the movements of defense between the shield and the endosperm, and Khirbet Ghazaleh and Bosra Sham, hauling the forum for a number of ways a pivotal, and the area is reached some of the villages and the province,

Its history and witness the courage of its people in fighting the French during the occupation of France, and the majority of the population of my family and the Kurdish Zoubi famous private ...

And did not stand a very small area with an area of 705 hectares in the day issued by the scene of the revolution and the emergence of Hdjaanha Oalo who voted right on the coverup ...

The reason for naming it back to the station for the convoys to the Arab Levant and its name is linked to the sense of history and music

What a girl, and distinguish the beautiful customs and traditions which brought the hearts of everyone involved other people joy and sorrow, and brought them together

palm Intimacy and love and solidarity. And also have a distinctive social reality ..

It with economic reality is unique also has contributed many of the children of expatriates in increased income, and is growing physically, economically important, as known to people they like science, is the majority of the people of the town's intellectuals. The estimated number of people of the town between 20 to 23 thousand people .. The history and pronunciation of affairs may Bzla ... Daughter of the splendor and strength .. And soil irrigated by the blood of ancestors ... The blending of the blood Ahrarh with free

Endosperm Fajtoa finest lines in the history of the tournament Alahly ... The said Mujahid Sultan Pasha al-Atrash for this battle Almsvrh

It is one of the most important battles during the Great Syrian Revolution which reflected the national unity and cohesion and the unity of one people and the strength of the battle

Success after the landslide victory of the rebels in the battle of the farm timeless French tried to Almlmoa their dismembered bodies again, and despite the defeat Tktmanm not forget, even now. Carpiah general says in his memoirs about the battle Almsvrh: I prayed to heaven for the faithful to pray for this people great courage and great enthusiasm that I will about him all the strings of my heart and which I wish to die among his family days.

Today completes the plan to its heroes venerated ancestors ... Then they will emerge into squares to ring their throats as the nation and the freedom to me your wedding the death of the nation, the demonstrations will see their careers ... Place filled with banners that appear coordinated to the world the truth and legality of claims ... Seeks sons Ohazejehm as the most expensive home ... Vtnscherh hearts of ointments ...

Tribute to the free Almsvrh .. And each is free to secure national and that the sun does not create only from the heart of darkness, ... Planet of the Hauran Hilt ...

Freedom Days

Questions submitted from the days of freedom and we want to share with members of the page to see it ...

And has responded by Airka Chenoweth - a researcher at the non-violent resistance and the author of Why work of civil resistance in 2011.

1. Since the beginning of the revolution, has adopted a number of areas, including Darya and the hill and some areas of the column and shield approach to non-violence, and worked on its application to the extent of extremism in some cases. Ghias Matar, who was killed under torture in the dungeons of the Syrian security was a young Daria, who applied the strategy of brotherhood with the security men and worked in more than one occasion to provide them with water and flowers. It is true that the number of martyrs in these areas is very low compared with cities rebelling other in Syria, but that the rate of arrests was much higher, and this is why a lot of people think Jan's strategy fraternity this does not work, and that a military vehicle and one is enough to suppress any peaceful demonstration Daria in because people do not face the required force. What is your comment?

May be a method of brotherhood with the army in this way too risky at the moment, however it must be remembered that there are other methods can be resorted to for the success of nonviolent resistance efforts in Syria. There are columns standing upon the system could be targeted: for example, what are the categories used by the system in order to stay in power: economic elites, the oil workers, leaders of the Alawites? Must search for ways to be peaceful resistance through promotion of brotherhood with these categories, not to change their allegiance entirely in favor of the revolution, but to encourage them to stop cooperating with the lion. Is there a way to get them to declare their rejection of violence practiced by the system, or to convince them that they would be better off to leave soon?

My research shows that despite the defections in the ranks of the security forces may be helpful to the success of the revolution, but it is not essential. Furthermore, research shows that the campaign of peaceful takes about two and half years on average so check the results (either success or failure), with the passage of time may announce more of the officers and soldiers loyal to the regime dissidents, or may begin elites of capitalism by reference to the lion that his time is over, but This will only happen to step up pressure from activists in the revolution.

2. We recognize that general strikes can be an effective tool in the revolutions, but did not receive invitations to strike the desired response until today. We do not have unions support these strikes, and civil society organizations, organized, and not in the modern history of any campaigns of this type can be invoked the memory of Syrian youth. In the environment to such a degree of complexity, what do you think the approach could be taken to call for strikes may respond to the people?

Difficult to answer this question, but I know that some of the attempts were successful strike is actually very useful for advertising on these successes and the definition of the people as it was announced here: <http://www.lccsyria.org/2212>.

Freedom Days

I know that Friday is dedicated to the mass demonstrations, and may be useful to advertising through similar channels that on Wednesday (or any other day of the week) will be allocated to the general strike. Iranian Revolution (1978-1989) is a good example for the possibility of converting the successful demonstrations to strikes, even without effective regulation states. Certainly can be done in Syria.

3. Referring to the four studies in your book, everyone sees in Syria that the Syrian regime is the most brutal of all dictatorships in recent history. Is this true? Do you have examples of systems in months killed thousands of unarmed civilians, and arrested tens of thousands of activists, killing dozens of them under torture?

There is no doubt that the Assad regime is one of the most repressive regimes, there are cases that matched or exceed it in terms of repression and murder. Many cases come to mind, including Iran, and Chile under Pinochet (1974-1988); the apartheid regime in South Africa, and I am sure also that the Palestinians who have lived under Israeli military occupation will claim that they are exposed to similar levels of repression.

4. That seen in the light of the political opposition in Syria divisions, what is your opinion, positive or negative impact of the absence of a charismatic leader of the opposition (such as Khomeini in Iran) in the Syrian Revolution?

The presence of one leader of the revolution, it is always vulnerable to repression or liquidation by the government, and for this reason, the movement does not need one leader to achieve success, but in dire need of leadership. Need revolution to a central committee or a national body to organize and communicate, coordinate and unite the various local committees. If you did not bring about a peaceful movement of this kind, then the Syrian army, may try to take over this role, I do not think that the majority of Syrians want that their future is determined by the Syrian army free.

5. What are the tactics of peaceful resistance that can be applied in Syria? Where do you think we go wrong?

Can not say that the movement "wrong" only because they did not win today. As I mentioned earlier, you need the revolution for two years and a half, on average, so take its course. Many of the revolutions, as is the case in Egypt, and required more time than that (more than 8 years in the case of Egypt). Pay attention to the demonstrations in Egypt have emerged only in the few weeks that preceded the fall of the Mubarak regime. In Tunisia, strikes and demonstrations began in 2008, so it should not be judged on the success of the revolution in Syria by comparing only the last stages of these revolutions. Syrians are doing a great job! Do not lose hope.

Now I can add that one of the shortcomings of the movement may be over-reliance on the demonstrations as a means of conflict. Although the demonstrations are very important to show the level of solidarity with the revolution, etc. .. However, it continues in this way makes them easily susceptible to repression by the system.

Freedom Days

The question is: What is the way to end the killings and repression practiced by the Assad regime? The key is to raise the costs of this repression. This means that it should make the possibility of finding the activists and the arrest or the suppression of demonstrators by the system more difficult as possible so maybe it's time to launch a campaign of non-cooperation of a comprehensive, while maintaining the pressure through demonstrations and other means, here's a list of methods of non-cooperation that can be applied:

[http:// www.canvasopedia.org / noncooperation.php](http://www.canvasopedia.org/noncooperation.php)

6. It is estimated that three to four million people (15-20% of the population) came out in the streets of Syria in the peak days, before the authorities launch military operations on a large scale in the rebellious cities. I understood from your study that this ratio is a key factor to assess the success of the revolution, does this applies to the case of Syria? What are the other factors that need to be drawn to her?

To fall on the Syrian case, and now the ability to make repression too costly for the Syrian regime is the key, and this requires to maintain the numbers of participants, at the same time engaging in the activities of a comprehensive civil disobedience.

7. Many people believe that the demonstrations and civil resistance are one thing, and therefore some may consider evidence of the failure of demonstration of the ineffectiveness of civil resistance. How do you think we can take advantage of the willingness of people to get out to demonstrate in this brutal environment, and expose themselves to risk of arrest and murder, how can guide the courage to achieve the goal of neutralizing the security forces or increase the number of defectors from the regime?

As I said the demonstrations are just one type of non-violent resistance, and although it serves many purposes, including to show the numbers of supporters of the revolution, but they make people vulnerable to repression easily. The lack of cooperation, strikes, boycotts, political, economic, and work slowly, all of which means very good for the economy to deliver a state of stagnation. You Find the centers of power, which rests upon the basic system and work to undermine these centers as possible.

8. How do you think will contribute to free the Syrian army, composed mainly of officers and soldiers of the dissidents of the Syrian army, the success (or failure) of the revolution?

I do not think that the Syrian army will free very big difference, except in the case of stop activists from participating in the failed revolution or resistance in the autism spectrum. If you are still involved extensive and successful efforts to unify movements of nonviolent resistance and agreed to a unified vision for the future, then the activity will be the presence of the Syrian army is significant. You can read more about this topic in my blog: <http://echenoweth.faculty.wesleyan.edu/>
