

**Civilians of the besieged Wa'ar neighborhood in
Homs city were compelled to sign an agreement**

**led to forced displacement of the local people lived in the neighborhood. This
agreement was under the supervision of Russia and came for the sake of the
.Iranian militias whose forces participated in laying siege to the neighborhood**

**Of course, this came after three years of regime's using of combined weapons
against the civilians of the neighborhood including starving ,besiege ,random
shelling and air strikes which nearly destroyed everything. As the result of this
agreement, Homs will witness a new forced displacement of the local citizens after
the forced displacement of the local people which took place in the old
neighborhoods of glorious Homs in 2014. And It will also witness the end of one of
.series of the Demographic change in Syria**

**Therefore, Watan liberation movement, through its two wings military one and
civilian one, condemns this ill -fated agreement and considers it as one of the
regime and its allies' crimes against humanity. These crimes got countless. The
movement also considers this agreement as a continuation of the regime's efforts
to evacuate Syrian areas from their local citizens and resettle murders and
strangers instead. The movement will not stand by idly, but it will follow every
legal method, in cooperation with the rest of the revolution forces, to preserve the
blessed Syrian fundamentals of the revolution and to save the souls of the
oppressed Syrian civilians. It seeks retribution against the criminals and the
.murders**

God often helpless
